## **William Kelly New Director of Engineering At Gurwin Jewish Nursing & Rehabilitation Center**

**COMMACK, NY** -- Gurwin Jewish Nursing & Rehabilitation Center is pleased to announce that William Kelly has joined the organization as Director of Engineering. Kelly has more than 25 years of experience in the long-term care industry, working in a variety of engineering capacities. In his new role at Gurwin's 460-bed facility in Commack, Kelly is responsible for the overall operation and function of all equipment and oversees the facility's safety and compliance programs.

According to Herbert H. Friedman, Gurwin's Executive Vice President/CEO, "Bill brings extensive experience in all facets of facilities management that will benefit our Center. His knowledge of the unique requirements of a nursing and rehabilitation center and his commitment to excellence will ensure the safe, continuous and cost-efficient operation of our facility. We are pleased to welcome Bill to the Gurwin team."

"Gurwin's reputation for excellence is well-known throughout the industry," Kelly said. "I am pleased to be part of such a stellar organization and look forward to working with the dedicated staff members who help to keep Gurwin's cutting-edge facility clean, safe and hospitable for its residents, employees and visitors."

*Gurwin Jewish Nursing & Rehabilitation Center is a 460-bed nursing care facility located in Commack, Long Island. Gurwin offers skilled nursing care, short-term rehabilitation, medical/post-surgical subacute care, respiratory and ventilator dependent care, an adult day health program, on-site dialysis, hospice and palliative care, home care and assisted living. Visit us at [www.gurwin.org](http://www.gurwin.org).*
