Dear Lindner Residents and Family Members:

I am writing to inform you that we learned today of positive COVID-19 test results for one of our employees as well as one of our residents. There is no need for further quarantine of residents due to these new positive test results as these individuals did not have contact with residents within the past week.

We are very happy about the response thus far to the opportunity to receive the COVID-19 vaccine here at Lindner. The first dose of the two-dose Pfizer vaccine will be available for staff and residents on Monday, January 18. So far, the vast majority of residents have consented to the vaccine, and we are anticipating that more than 50% of our staff will take it on this first round. Any staff or residents who do not take the vaccine on Monday will have an opportunity to do so at the second clinic, scheduled for February 8. As you may know, our pharmacy partner, Walgreens, will be here for three clinic dates, all 21 days apart, to administer the vaccine fully to those who are interested. Further information can be found on our website at https://www.gurwin.org/vaccine-at-lindner/

As always, please reach out to any member of my team should you have any questions or concerns.

Sincerely,

Michael Letter
Administrator/COO

It's flu season! Be sure to get your flu shot today!
