Dear Gurwin Residents and Family Members:

We are writing to inform you that we received notification today that two of our staff members have tested positive for COVID-19, one of whom has no resident contact, and the other who has not been in our Center for more than two weeks. We are currently conducting contact tracing based on these positive test results, and should there be any residents or staff members who may have been exposed, they will be tested twice in the coming days to ensure negative results. If this affects your loved one, his/her designated representative will have been notified by a call today.

If you are coming to visit, we must caution that there is an increased risk of exposure to COVID-19 when we have positive cases among our residents and staff. We continue enhanced sanitizing efforts and educate our staff regularly on protocols for infection control, both at work and in their personal lives. Every effort is made in caring for our residents to prevent the spread of COVID-19, including asking our visitors for their help.

If you are visiting your loved one, please be sure to comply with the following: Masks are required for all visitors upon entry and at all times when moving about in the facility to and from your visit. We **strongly advise** all visitors to properly wear a mask throughout your time with your loved one, as well, and to encourage the resident you are visiting to wear a mask, if tolerated, for their safety. In addition, we ask that visitors sanitize their hands often and maintain physical distancing of at least six feet where possible throughout the visit.

Although visitation continues on all units, we feel it is important to remind you of the risks of visiting whenever there is a COVID-19 investigation underway, and the best way to protect yourself and others is to follow all infection control protocols as outlined above.

We appreciate your cooperation. Please email info@gurwin.org with questions. Thank you.
